### Why Own Copper?

#### 1. Copper Demand Is Growing

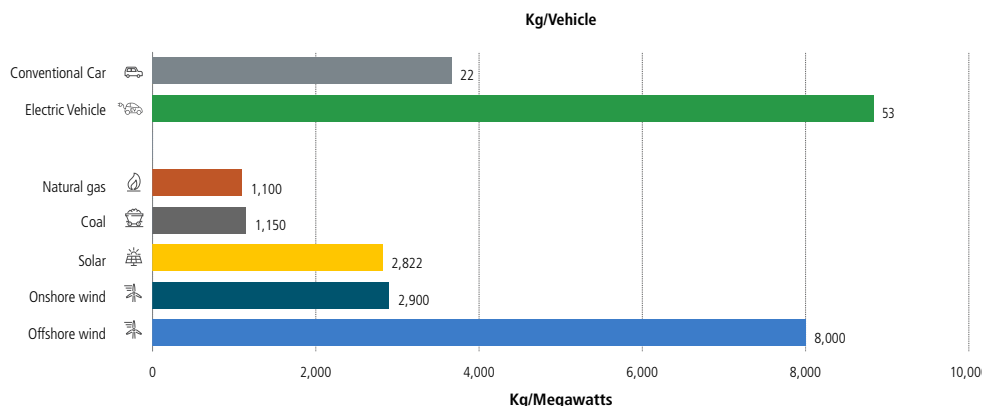

Demand for electricity is estimated to increase 165% by 2050<sup>2</sup> as middle classes develop in the East, clean energy technologies proliferate, electric vehicles (EVs) gain market shares and artificial intelligence (AI) data centers provide a new demand shock for copper markets.

<sup>2</sup> Source: IEA World Energy Outlook 2023 Net Zero Emissions Scenario.

#### 2. Copper Is Critical to the Future of Energy

Copper is required for energy transmission and infrastructure development. Energy grids, clean energy technologies and current and developing digital technologies require copper. EVs and renewable energy sources are more copper intensive.

## 3. AI Data Centers Require Large Quantities of Copper

Artificial Intelligence (AI) data centers are driving up electricity and copper demand. The U.S. alone is expected to add significant capacity by the end of the decade, requiring a massive amount of copper. This trend is likely to continue as AI advances.

Projected Copper Demand from Global Data Centers

Source: J.P. Morgan Copper & AI The Coming Wave, March 28, 2024.

The global copper market was valued at \$US183 billion in 2022, and ranks behind iron ore and gold as the third largest metals market by U.S. dollar value.

## 4. Copper Supply/Demand Gap Is Widening

Based on projections, copper supplies are not expected to keep up with the growing demand for copper over time.

## 5. Copper Supply Faces Challenges

While Chile is the world's largest copper producer, ore grades are declining and supply disruptions are common. Major new copper discoveries are infrequent, and lead times and costs to develop new mines are significant.
